

Building Homes, Together

How many sponsors does it take to build
a Habitat home on Cape Cod?

Habitat works to raise approximately \$200,000 per home to bridge the gap between construction costs and the affordable price our homeowners pay, ensuring every family has the opportunity to achieve homeownership.

This vital funding comes from home sponsorships (\$50,000 each, our goal is always two), solar sponsorships (\$25,000), and landscaping sponsorships (\$10,000). Habitat raises the remaining funds (about \$65,000) through raffles, cars for homes, donations, grants, ReStore sales, and events.

Together, these contributions make affordable homeownership possible right here on Cape Cod.
